

DZD Solar delivers nearly 1,000 PVs in one year

DZD Solar delivers nearly 1,000 PVs in one year

CIANEWS) - DZD Solar, a division of DZ Dražice, has delivered nearly 1,000 photovoltaic power plants since its opening in April 2022. The growing interest in renewable energy has contributed to the result. DZD's portfolio is based on products from Longi, Axitec, RECOM Technologies, the Dražice brand, and the Slovakian company Solax Power. In addition, DZ Dražice is preparing to install two photovoltaic power plants with a total capacity of approximately 440 kWp on the roofs of its production halls in Dražice and an automated warehouse in Luštěnice.
